Project Pricing Workbook - V09

Proposal

Date:	**9/18/25**	**Project Title:**	The Cooperative 1881 Apartments pha
Recipient:	Daniel Shaver	**Project City:**	Salt Lake City
Company:	Kier Construction	**Specifications:**	Acknowledged
Square Feet	170,654	**Addendum:**	Acknowledged

Daniel ,

Thank you for the opportunity to provide pricing on the The Cooperative 1881 Apartments phase 1 project in Salt Lake City. Please review our detailed pricing proposal and qualifications outlined below. We look forward to reviewing the project details with you soon!

Proposal Price

Sprinkler Install Phase 1 Building	**$**	**538,792.35**
Total Price w/ Options	**$**	**538,792.35**

Scope of Work:

Perform fire sprinkler design, calculations, and material listings booklet for deferred submittals permit review. Provide materials, equipment, & skilled labor to build the fully-functioning systems as permitted. Garage dry systems (2), combination wet standpipes & sprinkler systems. Schedule and complete inspections as required to close out permit. Installed in accordance with NFPA and local AHJ code. Retail space tenant finish work to be bid separatly.

Acknowledgement:

1. **Pricing valid for 10 days from the date of this proposal**
2. Our scope to begin @ 6" above finished floor at the riser flange, all underground by others
3. Installation lead times to be coordinated with Halo no less than 6 weeks in advance
4. No flow data is available for bid. Esimate assumes sufficient water flow for the system to be installed without use of a fire pump.
5. Import, domestic, light wall, and threaded light wall NFPA approved piping is acceptable
6. Sprinkler mains and lines in residencial units need to be coordinated with all trades so we can run strait lines to prevent increase to pipe si
7. A temporary standpipe will be installed when the building is framed up to the 4th foor.
8. Halo assumed a manual wet standpipe for this estimate.
9. All ceiling tile work is to be performed by others, including replacement to damaged / unusable tiles
10. Bulk main for the standpipe
11. Halo bid assumes installation of overhead piping from a smooth, flat, clear floor space
12. No walls, stored materials or similar obstructions are expected to be present for overhead rough install
13. Work schedule includes 8.5 hours per day and 5 days per week.

Inclusions:

1. Pricing covers install based on documents provided for bidding
2. Project management, travel costs, close out documentation, and submittals are included
3. Pricing includes new piping, fittings, valves, sprinkler heads in accordance with bid documents
4. Sales taxes are included
5. Each level will be hydrostatically tested one time once perminatn heat has been onstalled or a release has be signed by owner/ GC.
6. Scissor lifts, service vehicles, and small hand tools are included in this bid
7. Halo has included white or chrome semi-recessed heads in finished ceilings.

8 Permit fees are included up to - $3250
9 Includes (8) Rough-in Mobilizations & (8) Trim mobilizations
10 Wall Mount fire department connection at riser room

Exclusions:

1 Pricing increases received after the date of this proposal are excluded
2 Wiring, alarm, temp power, smoke & heat vents, FD access doors
3 Pre-action systems, anti-freeze systems, hose valves, wet chemical systems
4 Premium time, double time, prevailing wages
5 Heads around equipment not shown on bid documents
6 Paint, paint prep, refuse containers, haul off charges
7 3-D modelling and BIM coordination are excluded
8 Building signage, fire extinguishers & cabinets, dry chemical systems
9 Cutting, patching, ceiling tile work of any kind, ceiling grid repairs or adjustments
10 Obstructed work, additional mobilizations, limited access, inefficiencies caused by others
11 Excludes underground work for fire service line into the buidling
12 Galvanized steel pipe for garage dry system & L3 floor overhangs
13 remotely-located or yard fire department connection
14 roof attic space dry system. Combustible Cavity to be filled completely with insulation
15 No area-phasing per floor has been considered in this cost.

Respectfully submitted,

Dan Farnsworth

2025 Statement of Qualifications

⊗ Company Bio

Halo Fire Protection, LLC was organized by Dan Farnsworth, and Nathan Boyd in 2007. Halo is currently licensed in 38 of the United States, installing wet and dry fire sprinkler systems for over 40 general contracting firms. Halo's owners have over 44 years of combined fire sprinkler installation, maintenance, and servicing experience. Halo Corporate resides in Mesa Arizona with one remote location in Ogden Utah. Most of the work Halo performs is outside the state of AZ. Their core group of travelling installers provide efficient, professional, high quality fire protection installations, and have an extremely high rate of repeat business with their customers.
